320.88 – Automatic Trouser Ironing Unit

The model 320, widely known in the garment industry, is the most suitable machine for large production volumes with high quality performances, specifically requested by hospital facilities. It's an automatic four-station unit for the finishing of trousers without pleats. It's equipped with a 3 HP blowing fan in order to ensure the garment drying during the entire pressing cycle. An electro-mechanical device avoids any fabric stress neither in trouser top nor in cuffs legs. In this specific regard, the pressing of the trouser bottom leg is steaming to ensure drying and nice finishing of the leg cuffs. The machine is also equipped with an automatic un-loader and a conveyor belt for trousers as well as with a PLC programmer.

321.700 – Jeans Finisher

one steaming and air blowing working station
top modeled shapes. The tension is exerted on the side top trousers.
the foreseen set of shapes is the medium one (on request also the other shapes mentioned in the accessories can be fitted on the machine)
trouser leg tensioning device with adjustment suitable for both short or long trousers and babies shorts too.
steam flow adjustment and steam over-heating
front waistband-fly locking
adjustable and movable legs clamps
hot air blowing by a powerful electric fan of 1.5 KW
pressure adjustment of legs clamps
simple and complete control system of the machine by PLC and display
production counter
operated by a sequential control pedal. Easy to use, reaching the best pressing results
the front waistband-fly locking keeps the garment in the correct position during the pressing cycle
It is the innovative electro pneumatic conditioner for finishing of trousers without pleats, foreseen for adaption to sizing device for top and legs length.

MACPI- 321.715 – Jeans Finisher

Anti-stretch device for top & leg, double cylinder, with mechanical block for high speed and extreme sensitivity for stretching fabrics.

FINISHING OF TROUSERS WITHOUT PLEATS WITH POCKETS, FLAP AND BOTTOM PRESSING

Electromagnetic unit for trouser finishing without pleats, suitable for application of top and legs sizing device.

Possibility for flap and front pocket pressing

Trousers bottom legs pressing, with heated and steaming shape

Sizing device for top, with warning device of out of size (small)

Sizing device for legs length, with warning device of out of size (short)

Flap pressing, with heated and steaming shape

Front pockets pressing, with heated and steaming shape

Shaped medium size for tops. The tension is released on the trouser top sides. Standard shape fitted on the machine (please see below for available shapes on request)

Trouser tensioning device by mechanical adjustment for pressing both babies short and large size men's trousers (possibility of legs sizing changing loading position)

Pneumatic adjustment for legs and tops tensioning by a sensor for position locking

Adjustable steaming flow

Device to adjust air blowing flow

Flap locking shape

Adjustable and tilting legs clamps

Steam over-heating

Air blowing by electric fan (KW 2.25)

Air heating/blowing

Adjustable clamps pressure

Programmer TSM 9.20 3.8" LCD graphic TOUCH SCREEN display with possibility to put 20 programmes

Connection: Connection to air blowing 6Ate and Connection to steam 6Ate

Installed Power KW 1.7 Electric feeding 3~50Hz 400 V
